## Projects

**Sudoku Solver** Python, Pytest

01/2021

- Object-oriented, test-driven implementation of the Backtracking Sudoku Solving Algorithm.
- Design of 4 single-purpose modules, each with a test module which dictates the use cases it has to comply with.
- Optimized the solving algorithm to execute a maximum of 1.4 seconds, down from 3.7 seconds.

**Finance & Stocks** Python, Flask, SQLite

04/2020

- Development of a web application to simulate the purchasing and selling of market shares with real prices.
- Operations done using prices obtained from the IEX Cloud API and stored on a SQLite database.
- Working implementation of users, shares per users, and purchase history tables in SQL.

**Basic Compiler** C, Flex, Bison

11/2019

- Implementation of a compiler that recognizes left-derived grammars and executes them.
- Usage of a simplified syntax tree structure to store instructions to follow in order.
- Variables and functions stored in a symbol table using a hash table.

**Kubeet Web** Typescript, Angular 7, Firebase

05/2018

- Creation of 13 Angular components to present a single page application similar to Udemy.
- Implementation of a catalog view of self-study material, consisting of video and text lessons.
- Storage and retrieval of data using an external source, Firebase.

**Crafter Mobile** Swift, Xcode

05/2018

- Creation of 13 Swift components managing a bus monitoring prototype app for the iOS platform.
- Implementation of 2 responsive tables and 5 interfaces accessible from the application's home menu.

## Experience

**Prep@Net** Online Tutor Intern , Puebla, Puebla

08/2018 - 11/2018

- Follow-up of 12 students during their quarter year, supporting them in learning Microsoft Word and Excel.
- Each monday they were given a weekly agenda to learn their responsibilities for the following week.
- Assesment of their homework every friday, in addition to giving advice at the times scheduled by the student.

**ITESM CCV** IT Intern , Fortin, Veracruz

01/2016 - 04/2016

- Maintenance of at least 6 Windows work computers per week, cleaning temporary files.
- Installation of office applications such as Microsoft Office, Adobe Library, and other time-management apps.

## Competences

**Soft Skills** Responsible, Adaptable, Transparent, Autodidactic, Early bird (4am), Player-Learner Mentality.
